Strength points

Willpower points

ORFEN

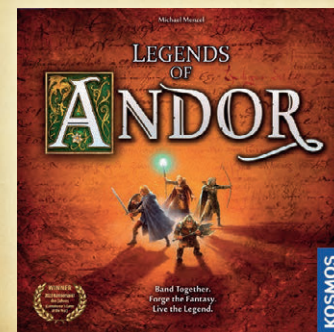

Wolf warrior from the high mountains
Rank 6

Special ability: In a battle, Orfen has strength points corresponding to **at least** the “**tens**” place of his current space number. So if he is on space 46, his strength points total would be at least 4. In a battle with a **troll**, these 4 points would be **added** to his strength points.

This hero board expands the possibilities of play of the “Legends of Andor” game by adding another strong hero and an equally strong heroine. Orfen and Marfa replace the male and female dwarves Kram and Bait. They are played using the yellow-colored materials for these two heroes (plastic holder, 3 dice, 2 wooden disks, 1 wooden cube).
